

the world of medin[®]
products.

Giving future...

medin[®]
medical innovations

For a good start in life –

highest quality standards and reliability.

The first breaths, immediately after birth, are important and the fundamental pre-condition for an optimal start in an independent and successful life. With its nCPAP products our company supports the spontaneous breathing of newborns and premature babies. The work of breathing is substantially reduced. nCPAP can reduce WOB, enhances FRC, improves compliance and can help to reduce RDS.

Furthermore our nCPAP system can be used after a mechanical ventilation to facilitate weaning from the respirator. Our products monitor and support the natural spontaneous breathing of the patient (1),(2),(3),(4).

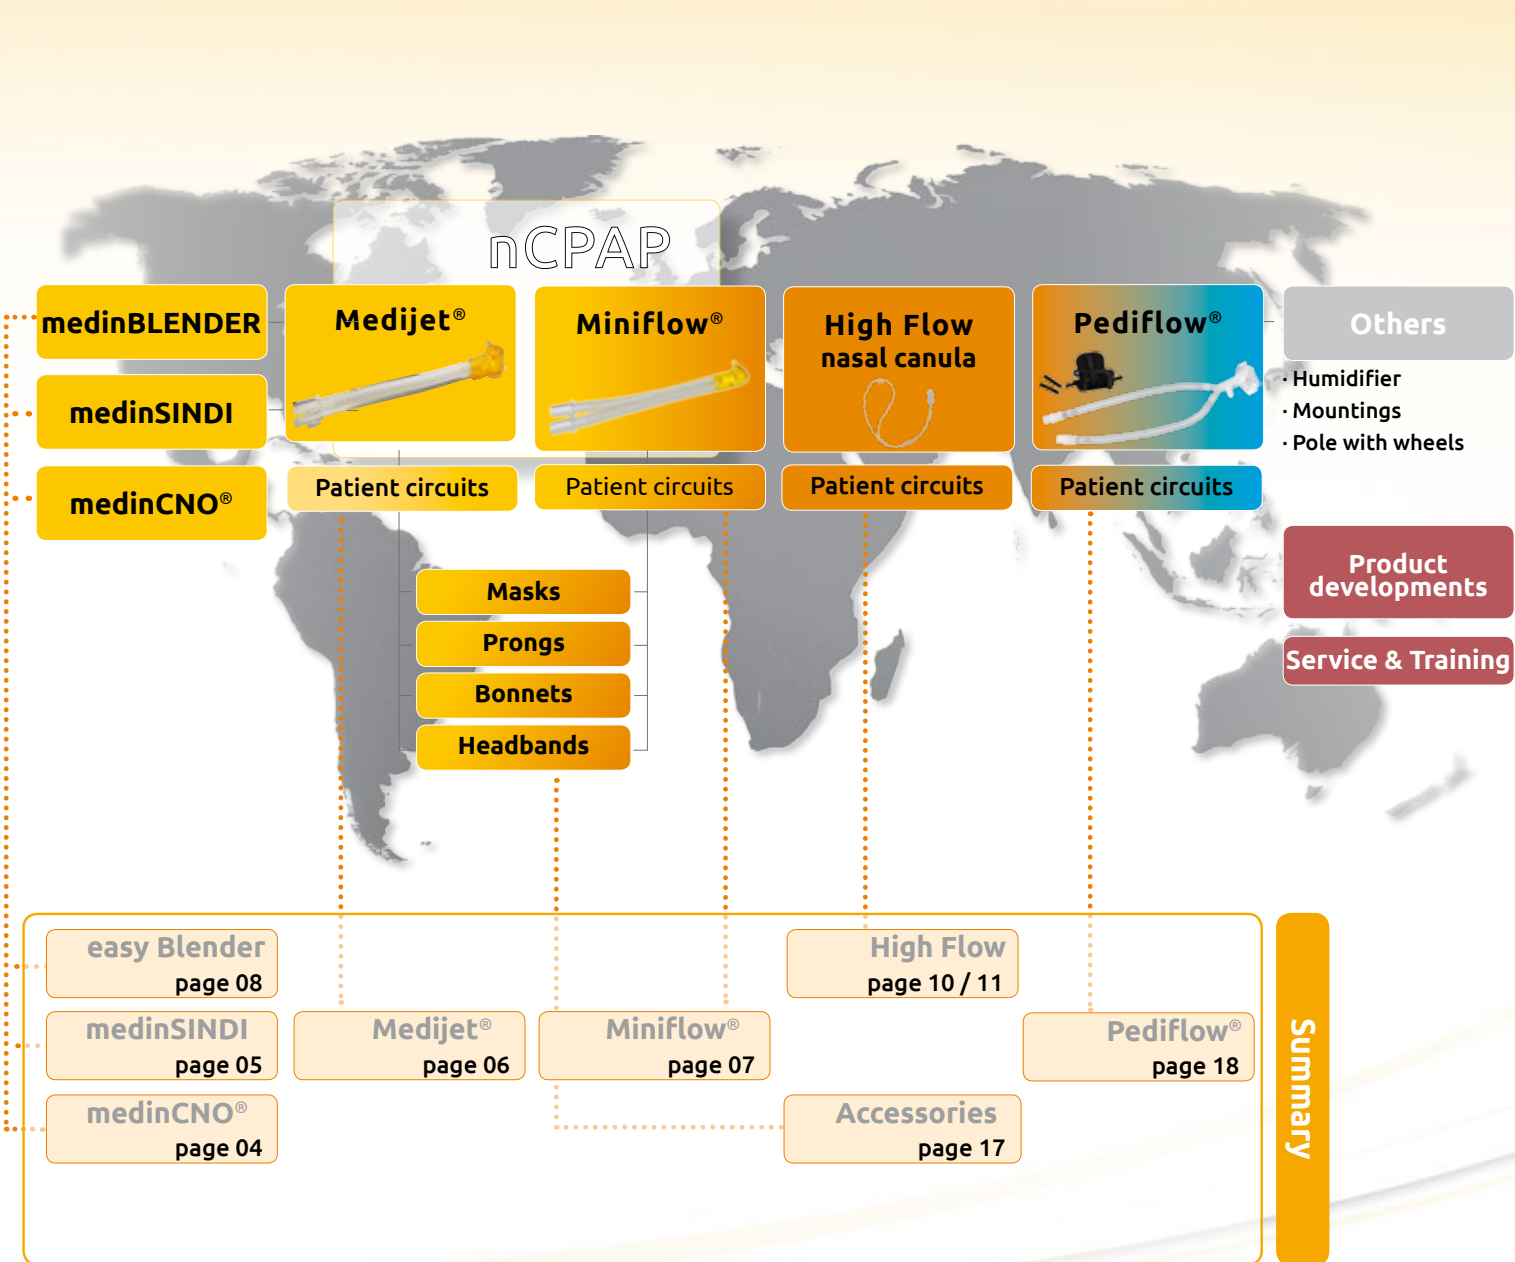

All systems and products are developed and manufactured in Germany. As in-house development, our products are protected by patents and utility patents. We serve our products to the international market through our distributors. We offer an international approach, which is national adaptable with our help.

The world of medin® –

CPAP systems for premature infants & newborns.

The first device worldwide with nCPAP, Apnea nCPAP, SNIPPV and nasal high frequency ventilation in combination.

medinCNO® is used as stationary nCPAP driver for the nCPAP therapy of neonates and premature infants treated in combination with the nCPAP generator Medijet® in intensive care units.

medinCNO® may only be used in combination with simultaneous and constant hemodynamic monitoring of the patient, only by trained medical personnel and only during clinical use.

- Comprehensive combination of basic nCPAP, monitoring, Synchronization bilevel nCpap and nasal high frequency ventilation
- Real Pressure Trigger
- Special Apnea Mode
- Accessories identical to medinSINDI
- Intuitive and user friendly
- Battery operating for 2h

nCPAP generator Medijet® perfect combination in use with medinCNO® driver.

technical data & facts

Classification	IIb
Size of the device incl. connectors	29 cm x 23,5 cm x 18 cm (W x H x D)
Weight	4,75 kg
Display	7.0" – multicolor, 800 x 480 Pixel
Shown values	· CPAP pressure · CPAP pressure curve (diagram) · Flow · Oxygen concentration · Respiration rate
Electric support	
Power supply (mains)	100-240 V AC / 50-60Hz
Battery	14,4 V DC, 2 hrs. (Bat. operation mode)
Gas supply – Air	3 – 6 bar
Gas supply – O₂	3 – 6 bar
Parameters & Sensors	
CPAP pressure	0 - 15 cm H ₂ O
Oxygen concentration	21% to 100% oxygen
Safety valves:	Mechanical overpressure valve Electric shut off valve
Oxygen sensor	MLF16, OOM102
Connectors	
Gas supply connectors	DISS or NIST standard
Patient gas output	M22 / F 15
Patient pressure port	Luer
Mounting	On hospital rails (10 x 25 mm)
Modes	· nCPAP with Leak Assist · Apnea monitored nCPAP with backup function and NIPPV · nasal high frequency ventilation · SNIPPV with backup function
Alarms	· Disconnection · Overpressure · High CPAP pressure (adjustable) · Low CPAP pressure (adjustable) · Oxygen concentration · Gas supply pressure air · Gas supply pressure O ₂
Alarm signals	Optical, acoustical & text message
Connection to external central alarm system	Optional
Data handling	
Actual data	Shown at the display
Internal data recording	28 days
External data interface	USB, RS232 (optional)
Accessories	
Combinable nCPAP generators	Medijet® 1000, Medijet® 1010, Medijet®1020
Tube circuits	Various heated circuits for different kind of humidifiers available.

technical data & facts

Classification	IIb
Size of the device incl. connectors	24cm x 21,5cm x 14,5cm (W x H x D)
Weight	2,80kg
Display	96 x 61mm – monochrome
Shown values	<ul style="list-style-type: none"> · CPAP pressure, digital · CPAP pressure curve (diagram) · Alarm levels, high and low · Oxygen concentration digital · Spontaneous breathing frequent
Electric support	
Power supply (mains)	100-240 V AC / 50-60Hz/ 400mA
Battery	9,6 VDC, 5 hrs. (Bat. operation mode)
Gas supply – Air	3,5 – 6 bar
Gas supply – O ₂	3,5 – 6 bar
Parameters & Sensors	
CPAP pressure	0 - 10 cm H ₂ O
Oxygen concentration	21% to 100% oxygen
Safety valves:	Mechanical overpressure valve (80cm H ₂ O)
Oxygen sensor	MLF16, OOM102
Modes	· CPAP
Alarms	<ul style="list-style-type: none"> · Disconnection · Overpressure · High CPAP pressure (adjustable) · Low CPAP pressure (adjustable) · Oxygen concentration · Gas supply pressure air · Gas supply pressure O₂

Connection to external central alarm system	Optional
Data handling	
Internal data recording	8 hours
Data interface	RS 232
Accessories	
Combinable nCPAP generators	Medijet® 1000, Medijet® 1010, Medijet®1020

The long term approved solution with monitoring unit.

The medinSINDI is a universal gas delivery unit. It can be used with and without any power.

- Display of nCPAP pressure in analogue curve and digital form
- Display of oxygen concentration in bargraph and digital form
- Display spontaneous breathing frequency in blinking and digital form
- Display of flexible setting upper and lower alarm for nCPAP pressure
- Resets alarms – mute 2 minutes or quit
- Disconnection alarm for nCPAP (if patient is lower than 1,5 cm H₂O)
- Integrated service software
- Battery operating for about 5 hrs. (incl. charging control)
- FiO₂ Trend
- Manual push ventilation with REF SMPV

nCPAP generator Medijet®
perfect combination in use
with medinSINDI.

Medijet®

[Active/ Variable flow generator]

REF 1000

Advantages of the nCPAP Medijet® Generator:

- Increase of FRC and improvement of compliance (1), (2)
- Reduction of work of breathing (3), (4)
- Low noise level (5)
- Benveniste princip (6) with volume reservoir, prenasal pressure measurement + non-aggressive flow application
- Perfect combination in use with medinCNO® driver

CPAP should be easy, inexpensive and safe!

functions

- A) nCPAP measurement
- B) Driveflow inlet
- C) Driveflow outlet
- D) Drug nebulizer port or
- E) Cap for close down
- F) Benveniste Valve
- G) Volume reservoir

technical data & facts

Connectors	Flow and pressure
Working principle	Benveniste valve
CPAP level setting	0 to 10 cm H ₂ O
Noise level 5 cm H ₂ O	61dB (A)
Volume reservoir ml	4 ml - constant flush
Drug inhalation port	6,0 ID
Nasal connector 45° and 60°	Changeable
Packing unit	20

The Medijet® is also available as a reusable version. The nasal connector is not adjustable, therefore two different versions (45° = REF 1020 and 60° = REF 1010).

REF 1010

Miniflow® is a patient interface for the CPAP mode of ventilators. Miniflow® can therefore be connected to the inspiration and expiration tubes and thus to the ventilator. The ventilator adjusts and controls the CPAP parameter and provides the necessary gas flow.

You can connect the Miniflow® to the inspiration and the expiration tube, if your ventilator needs an external pressure measurement, add the T-piece into this connection (REF 4010).

Advantages of the nCPAP Miniflow® Generator:

- Minimal dead space
- Separation of inspiration- and expiration-gases
- Compatible with Medijet® accessoires
- Reduction of work of breathing (1)
- Flexible prong adapter for best position
- Simple use

functions

- A) Inspiration
- B) Expiration
- C) Separation wall
- D) Flexible prong adapter

- nCPAP generator Miniflow®
 - Always use the largest prong to avoid leakage!
 - Switch between prong and mask after some hours!
 - Insert the prong only halfway into the nose!

IMPORTANT:
Single use product for a single patient only!

(1) Work of Breathing during Nasal Continuous Positive Airway Pressure in Preterm Infants; Ellina Lipsten et al. Journal of Perinatology 2005; 25:453-458

medin® Blenders

medin® blenders are an easy system for oxygen therapy as well as for easy set-ups for nCPAP.

The biggest difference compared to the other devices is, that there is no electronical feedback about parameters like CPAP pressure or breathing frequency. There are different variations:

Blender with flowmeter.

The blender is mounted together with two flowmeters (0-3,5 / 0-15 lpm). This connection to the circuit is a 22M or tapped connector.

REF 1090

Blender as single unit.

The blender as a single unit combined with a screwable flowmeter (3 lpm or 15 lpm). The connection to the circuit is a tapped outlet converter.

REF 1085_15

Bubble CPAP system.

The Bubble CPAP system is an easy and cheap solution to combine a blender with a mechanical CPAP valve (adjustable from 0.5 to 9.5 cm H₂O).

REF 2040

We recommend using always a water column (REF 1050) or a digital Manometer (0-30mbar REF 1026) in combination with the blenders.

REF 1026

REF 1050

Easy and simple CPAP

medin® created a basic nCPAP device and easy to use for nCPAP therapies.

We combined our existing well known easy blender (REF 1085_15) with a bubble valve (REF 2040).

With this Bubble valve you are able to adjust the nCPAP pressure between 0 and 9,5 mbar at 7 lpm. By using it in combination with our Miniflow® as a patient interface you will get all the benefit of fixation of the medin® product range!

Pressure adjustment 0-9,5mbar

Accessories:

- A) Bubbler (REF 2040)
- B) Blender (REF 1085_15)
- C) Miniflow (REF 4000)
- D) Wheelstand (REF 5001)
- E) Circuit (REF 206746 or REF 206748)
- F) Humidifier

Pole clamp (for Blender): REF 900MR170

Dual pole clamp (for Bubble column and humidifier): REF 20CL02

medin High Flow Concept

1. Low Resistance Version

medin is offering a low resistance nasal canula, which can be used with medinSINDI or medinBLENDER. This product can also be used with other flow drivers.

REF	QTY	Name	Size	Flow rate
1390	3/size	Set with three products (premature, neonatal, paediatric)	all three	depends on size

2. Simple Version

medin is offering cheap models of nasal canulas, which can be used with nearly every flow source (e.g. medinBLENDER).

REF	QTY	Name	Size	Flow rate
1300	10	Oxygen Nasal Canula 0	0	0-4 l/min.
1301	10	Oxygen Nasal Canula 0.5	0.5	0-4 l/min.
1302	10	Oxygen Nasal Canula 1	1	0-7 l/min.
1391	5/size	Set with five products	5/size	depends on size

- We recommend using a humidifier to reduce the discomfort of the baby.
- We recommend using an overpressure valve for safety of the baby.

Masks and Prongs

[Medijet® · Miniflow®]

Masks

REF see table >>

The masks have to be used in combination with the Medijet® or the Miniflow®. All masks are made of silicone. For choosing the correct size use the medin® measuring tape.

technical data & facts

Sets

medin® offers different sets for Medijet® and Miniflow®. These sets combine our generator, masks, prongs and bonnets in different sizes. Some of the sets also have circuits. A set makes it easier to start nCPAP therapy. The different sizes can be tried and afterwards the respective sizes can be ordered.

Accessories

Humidifiers · **HAMILTON-H900**

Respiratory humidifier with fully digital user interface for invasive and non-invasive application.

Independent of its outstanding performance specifications HAMILTON-H900 provides reasonable comfort to both user and patient:

- Integrated temperature probe
- Wall-heated, all-in-one breathing circuits
- Adjustable temperature and humidity settings
- Remote control from any compatible ventilator
- Pre-assembled and ready for use

Circuits for HAMILTON-H900 are also available. For more information please contact us.

Humidifiers · **Fisher & Paykel MR 850**

Aims to provide optimal humidity (37°C, 44 mg/L) for invasive ventilation, non-invasive ventilation, humidified High Flow Therapy oxygen therapy.

REF 1400

The first breaths, immediately after birth, are important and the fundamental pre-condition for an optimal start in an independent and successful life. With its nCPAP products our company supports the spontaneous breathing of newborns and premature babies. However, we don't stop here. With our Pediflow® we went one step further and developed the non-invasive respiratory mask for pediatric patients. For an easy and perfect fixation we designed a special headgear which adapts accurately to the baby's head. It is a single-use product, which is usable in clinics or in home therapy. Nevertheless, in spite of an excellent quality, gentle material and easy usage – the price is very competitive. With our Pediflow® you can take care of pediatric patients, still using a medin® product (1), (2), (3), (4), (5).

Advantages of the Pediflow® mask:

- Usable for infants up to approx. 10kg
- Usable in clinics or in home therapy
- Soft silicone mask avoids pressure marks or even skin damage
- Reduction of work of breathing (6)
- Simple use

technical facts & data

REF	Connector Flow input/output	Usage	Size	Packing unit
1400	7,4mm ID/ 10mm oD	Single use	One size	8

Pediflow® is usable also with our bubble system
